Art Unit: 3662

1. The changes to column 1 are denied. Applicant's specification states that the documents cited in the section applicant wishes to change are incorporated by reference (p. 2, lines 17-18). In order to incorporate a document by reference into an application, that reference must be identified sufficiently that one could identify that reference. The filed specification, p. 2, lines 23-24 does not appear to provide enough information for one to identify application 10/668,011 from it. At best, one would be able to identify 60/413251. While 10/668,011 is a non-provisional of 60/413251, a non-provisional can contain additional disclosures that were not in the provisional. Additionally, 10/668,011 is a non-provisional of several different provisionals, and so many differ in scope from 60/413251 due to these additional disclosures. The filed specification did not provide the necessary notice that application 10/668,011 was incorporated by reference into the patent. Thus, any change that would suggest application 10/668,011 is incorporated by reference into this patent is improper.
2. The change to column 6 is approved.
